

ENVIRONMENTAL POLICY

Management of Biospringer RS d.o.o. Senta with the activity of producing other food products, as well as all employees dedicated to environmental sustainability, therefore continuously improve our environmental protection system in accordance with all implemented standards, namely: BRC:GS; IFS; FSSC 22000; ISO 9001:2015; ISO 45001:2018 and especially with the requirements of ISO 14001:2015.

Environmental protection is an integral part of the business principles of Biospringer RS d.o.o. Senta.

We comply and regularly review all the relevant legislations and regulations related to environmental safety.

Our key objectives are:

- To innovate in our production processes in order to improve their energy efficiency and to create environmentally friendly products;
- Continually work to optimise the management of our waste, but also to contribute to the development of the recycling chain;
- To reduce the ecological footprint while controlling our water consumption and promoting renewable energies, while increasing staff awareness of good environmental practices.

By achieving these objectives, we constantly improve operational efficiency and potential of Biospringer RS d.o.o. Senta which is the interest of the owners, all employees and the entire community.
